

DATASHEET

Alfresco Connector for Hitachi HCP brings together the Hitachi Content Platform's state of the art content archiving functionality for large volumes of data and all the document management features provided by Alfresco, a leading and mature open source Enterprise Content Management since 2005.

Star Alfresco Connector for Hitachi HCP

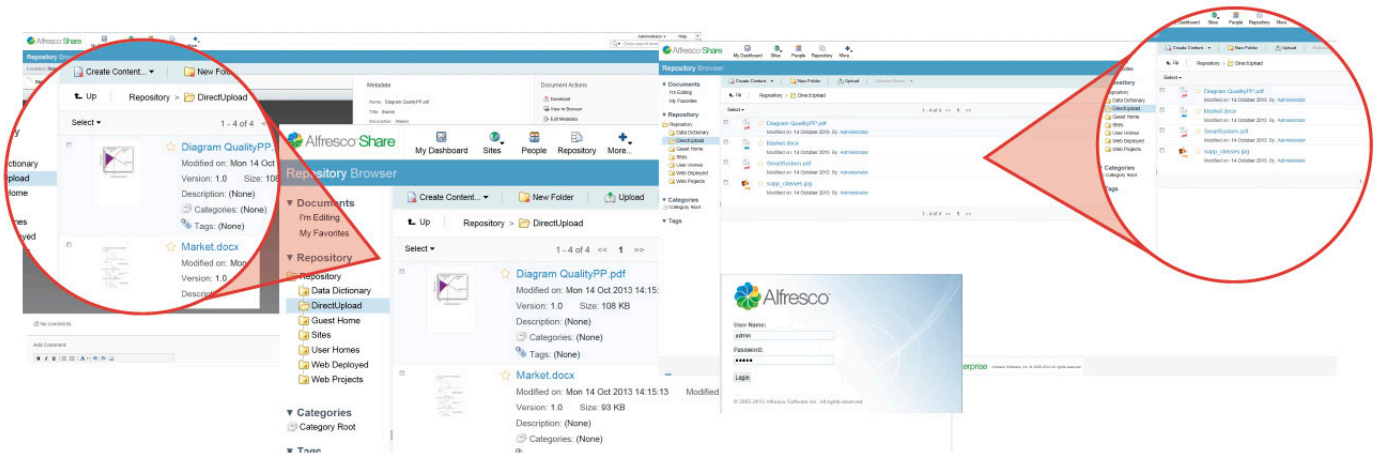

Star Alfresco Connector for Hitachi HCP provides a seamless integration between the two systems, allowing to store content from Alfresco inside the HCP store as an external storage area without any impact on the end user or the applications in place.

Benefits:

- Fully integrated with Alfresco Enterprise and Hitachi Content Platform;
- Independent of Alfresco user applications and Alfresco input methods;
- No impact on the existing systems, configurations and customizations;
- The content transfer is seamless to the business users, as they can upload content just like before and they can access old content without knowing it is stored in a different location;
- Use Alfresco retention, HCP retention or both – enforce content retention at HCP level, with or without Alfresco's Retention Management Module;
- Benefit from all the HCP main functionalities for the content saved in Alfresco (e.g. de-duplication, search and discovery, retention management, shredding);
- The performance and response time of the system can be maintained the same by choosing the appropriate way to transfer content to HCP – a scheduled transfer, or real-time upload;
- No hardware/software additional costs;
- Cut the costs used for a back-up system (hardware and licenses, tape back-up, external disks) and take advantage of Hitachi's product that supports many data types, applications and users in cloud and traditional IT environments;
- Highest performance transfer between HCP and Alfresco Content Services;
- Native implementation, using mature components.
- "No impact" on customizations.

Characteristics

- Built for compatibility – no known limitations to run on major Alfresco versions (3.4.x, 4.0.x, 4.2.x, 5.0.x) and HCP versions (4.x, 5.x, 6.x, 7.x), independent of the OS (Windows or Linux);
- No changes have to be done to the existing applications;
- Maximum performance and reliability using the native Alfresco Content Services;
- Fast and secure content transfer to HCP provided by HTTPS;
- Use multiple HCP storage destinations in a single Alfresco installation;
- Flexible ways of saving new and existing content to HCP, in real time or using scheduled jobs;
- Minimum impact on the end users, as the change is seamless for them;
- Minimum impact on Administrators and Developers: the connector's installation and configuration are done;
- Document metadata is copied to HCP and updated if needed, being available for use in searches inside HCP;
- The retention in HCP is set using a custom attribute or an attribute from the Retention Management Module;
- Decide which content to move to HCP with the logic of business rules;
- Content lifecycle management is completed using standard Alfresco functions - with no specific limitations.

Combined features for great performance:

- Meet governance retention requirements;
- Respond in time to audit and discovery requests;
- Protect and secure the business content in a safe and controlled environment;
- Save time and money reducing the back-up systems and the number of administrators;
- Simplify searches for the archived content;
- Collaborate in style by developing essential business information with Alfresco's great collaboration features and archive safely inside HCP.

Product proudly developed by Star Storage

Star Storage is a global technology provider developing and delivering state-of-the-art information protection and management solutions for top private and public organizations. With 17 years of experience, own Intellectual Property and a portfolio of over 500 customers on 4 continents, with strong expertise in top industries such as banking, insurance, telecom, manufacturing, utilities and public administration, the company plays a key role in the digital transformation, mobile and cloud journey of any size organization.
